Dear Mr. Clark:

John Deere Harvester Works Ash Disposal

Recently, Ralph Grotelueschen discussed with you the possibility of giving away ashes from the powerhouse to schools and municipalities to be used at their discretion without any liability to the John Deere Harvester Works. You responded favorably to the proposal.

In order to avoid any future problems, would you please confirm your approval of the plan in writing?

If you have further questions, please call me (309-792-5029).

Yours truly,

Michael E. McGuire
